

## **HOT HOLDING SOLUTIONS**

**FOOD DELIVERY | TAKEAWAY**

Williams Refrigeration now offer a number of hot-holding solutions to meet the ever changing delivery & takeaway needs of our customers.

# Hot Holding Solutions

The takeaway market has continued to evolve over the past few years, with the pandemic accelerating this change of both consumer and business mindset. For restaurants and cafes to high end, luxury bistros and even hotels, kitchens that once didn't see takeaways as a core part of its business model are continually adapting to the growing demand of the sector. Having a dedicated hot-holding area as a core function of a modern kitchen setup is key to meet this demand.

There are many benefits in adopting a Food-to-Go approach as it can play a vital part in streamlining processes in the kitchen. When kitchens are less busy, (non-peak periods), the opportunity is there to do more cooking and increase batch cooking too, fully preparing for the oncoming peak rush. Hot-holding helps by reducing stress and kitchen pressures, while also being able to deliver quality produce to customers fast.

## The Pizza Box Key Features

- Capacity for holding 10 pizza boxes
- To take pizza box size: 420 (W) x 420 (D) x 450mm (H) - Suitable for 16" pizza
